

Glenn Research Center

Conclusions

- ◆ **NASA Microgravity Combustion program has many accomplishments in its short history**
- ◆ **Combustion of solid, liquid, and gaseous fuels has been studied**
- ◆ **Observation of many new phenomena and development of improved models and theories**
- ◆ **Fluids and Combustion Facility will have extensive capabilities to support a wide range of combustion investigations**
- ◆ **Applications range from spacecraft fire safety, improvements in combustion efficiencies, reduction in pollutants, and synthesis of valuable products**
